GWS 12-125 S PROFESSIONAL: FURTHER INFORMATION

Product Highlights

The lightest and slimmest small angle grinder in the power class. A new level of power-to-grip-size ratio gives higher performance and the ergonomically designed grip means comfortable handling all day making your work easier. More power provides excellent performance meaning more productivity, especially under overload conditions. Longer tool life is achieved through the robust metal flange design and better motor cooling. The angle grinder features KickBack Control, Restart Protection, Overload Protection, and Soft Start for improved user safety, and its anti-vibration handle offers comfortable handling during working

Equipment & Application

The GWS 12-125 S Professional is designed for all-round use in horizontal, vertical, overhead and inside grinding or cutting thanks to its slim grip, compact size, and light weight. It is the first choice for excellent and stable performance, especially under overload or dusty conditions. The robust metal flange protects the gear set from wear and tear and the maze-shaped air inlet provides better airflow for motor cooling and prevents dust from accumulating in the motor. The ergonomic shape of the grip allows for comfortable handling and reduces fatigue after long hours of work. The speed selection function allows for working in various applications and materials
